

**FLOOR COATINGS**

## RX Floorguard Hi-Build

The ultimate heavy duty floor coating for high traffic areas. This completely solvent-free resin system is easily applied by brush or roller and when cured forms a hard-wearing protective barrier that is approximately five times thicker than a normal floor coating. RX Floorguard Hi-Build has a very low odour during application so is ideal for industrial and commercial floors, laboratories, water treatment plants, food processing areas, breweries, sewage plants, dairies and schools. Floorguard has tremendous abrasion resistance, excellent flexibility, is impervious to a wide range of chemicals and when cured is completely odour free.

- Excellent abrasion resistance
- Tremendous chemical resistance
- Excellent waterproofing qualities
- Easy to clean
- Low odour
- Five times thicker than a normal floor paint

Standard Colours

## RX Floorguard P2000

- RX Floorguard P2000 is a heavy to medium duty, flow applied, smooth flooring system based upon polyurethane technology.
- Provides excellent resistances to abrasion, chemical attack and any other physical aggression.
- RX Floorguard P2000 is volatile free, both during and after application, so work can be carried on in adjacent areas without fear of contamination.
- RX Floorguard P2000 is formulated to achieve maximum strength within minimum time, and with minimal disruption to your production cycle.
- Unlike concrete surfaces that dust when worn, RX Floorguard P2000 creates an impervious, hardwearing finish that lasts.
- The appearance is a seamless, smooth, high gloss finish with uniform colour.
- Designed for application between 2 and 6mm.
- It's ideally suited to areas subject to heavy duty use: chemical processing, engineering process areas and production areas.
