

FLOOR COATINGS**RX Toughseal UVC**

A twin pack polymer coating with tremendous flexibility and chemical resistance. Can be used on all types of surfaces such as concrete, wood and steel. This system is available in coloured or clear. The clear version can be used as a primer on porous surfaces and is excellent as a protective barrier on wood and for sealing dusty concrete.

Coverage: 6-8m² per kg depending on porosity.

- Excellent chemical resistance
- Very hard wearing
- Tremendous gloss
- Easy to apply
- Very flexible
- Quick drying

Standard Colours

**Other colours can be manufactured to order. Also available in clear.*

**RX Line Marker 2000**

RX Line Marker 2000 provides a cost effective solution for marking lines over large areas. An exceptionally hardwearing system Line Marker 2000 is a twin pack product that can be applied by brush or roller.

- Easy to apply
- Hard wearing
- Twin pack system

**RX Foodsafe Flooring**

Robex SA Food Safe offers a distinct advantage when it comes to delivering a long-lasting, durable finish that promotes optimum hygiene at all times. Food Safe is the ultimate fast-curing MMA resin system, which means there is a reduction in downtime for those who choose this flooring finish. By combining the strength of inter-coat adhesion with exceptional chemical, wear and slip resistance, Food Safe offers a guaranteed seamless flooring solution.

- 1 Hour Curing – Fast turnaround
- Long Service Life
- Seamless surfaces either smooth or non-slip
- Non-Absorbent
- High resistance to impact and mechanical wear
- Food safe – Highly chemical resistant and does not promote the growth of bacteria
