

METAL REPAIRS

RX Metal System Repair Kits

A range of easy to use products for repairing and preserving metal parts and components. Whether an emergency repair or long-term reclamation, there is a product to meet the problem.

All of our metal repair kits contain everything you need to carry out repairs on-site, including mixing bowls, spatulas, cleaner, etc.

RX Metal Systems are supplied in three grades

- Premier Metal
- Fluid Metal
- Rapid Metal

Features and Benefits

- Easy to use 1-1 mix
- Tremendous adhesion & compressive strength
- Excellent chemical resistance

RX Steel Epoxy Repair Sticks

Repair Sticks are based on our metal resin technology. The base and reactor are combined in an easy to use stick, you simply cut off the required amount and mix by hand then apply to the surface. Will not slump or drip, bonds quickly to most metals including steel (high and low carbon), aluminium and most other alloys.

Ideal for filling cracks in castings and rebuilding broken metal parts, gearboxes, engine housings, differential housings and machine cases etc. Repairs stripped threads, eliminates the need for expensive welding, can be drilled, filed, tapped, ground, sanded and painted when cured.

Steel Epoxy Repair Stick is ideal for emergency repairs to metal.

- Easy to use 1-1 mix
- Sets rapidly
