

WATERPROOFING**RX Trustcoat Waterproof Plus**

A colourless solution containing water repellent molecules that penetrate deep into the substrate to provide a highly durable barrier against water penetrations.

Trustcoat Waterproof Plus is easy to apply by brush or spray and will work on most surfaces including brick, concrete, natural and cast stone, asbestos, cement, chalk and limestone.

- Effective external protection for up to 10 years
- Stops cracking and spalling due to freezing and thawing
- Helps prevent growth of mildew, moss and lichen
- Allows surfaces to breath
- Improves thermal insulation
- Can be used as a damp proof membrane

**RX Protadeck**

Fast Track Protadeck Waterproofing coatings offer a high-performance, fast track waterproofing system that protects concrete, timber, masonry and steel structures from deterioration by water and chloride ions. It is an applied protective coating membrane and is designed as a water and chemical resistant coating with added abrasion resistance.

- Rapid application
- Quick curing (1 hour)
- Lightweight – Minimises dead load when compared to mastic asphalt
- Long service life – 10-year maintenance free guarantee
- UV Stable
- 380% Elongation
- Completely seamless – Mitigates problems associated with migration leaks
- Easy to repair

It is the only high performance waterproofing system that fully matches the demanding requirements of car park decking and critical waterproofing, and can be applied in quick time.
