

RX PROFLEX

Brush Grade

Tried and tested throughout the world, Proflex Brush Grade can be applied to any building surface without the use of a primer. It can also be applied in all weather conditions, even in the wet or underwater!

All the products in the Proflex range are based on modified liquid polypropylene combined with refined bitumen, selected synthetic resins and water displacing agents.

The Proflex range has tremendous adhesion and flexibility and can be used in extremes of climate with maximum performance, giving total adhesion, even at -18°C.

- Applied straight from the container
- Excellent flexibility
- Withstands extremes of temperature
- Can be applied in wet conditions
- Will not harden in the can
- Available in aluminium

Trowel Grade

Ideal for filling gaps and cracks, Proflex Trowel Grade is based on the same bitumen polypropylene technology as Proflex Brush Grade.

- Perfect for large gaps and cracks
- Will bond to all surfaces
- Remains flexible
- All-weather application

Spray Grade

Instant weather-proofing at the touch of a button.

- Useable in all weathers
- Ideal for inaccessible areas
