

RX Concrete Repairs

Our condition-specific concrete floor repair products take into consideration the climate, average temperatures and wear and tear on concrete floors over time. All the products in the Dura Quartz range are based on the latest synthetic resin technology combined with our computer-graded quartz aggregate. It is the ultimate answer to concrete repairs in areas of high wear, floor movement and chemical or effluent attack.

Products included in this range

Dura Quartz

The ultimate answer to concrete repairs in areas of high wear, floor movement and chemical or effluent attack. This product is ideally suited to repairs on concrete structures, street furniture, etc.

- Compressive strength of 90 Mpa.
- Excellent chemical resistance.
- Tremendous adhesion.
- Does not shrink.

Dura Quartz Rapid

Dura Quartz Rapid is an MMA-based product that cures to a strength of 60 MPa. It boasts an impressive curing time of just one hour, making it a highly efficient and robust solution for various applications.

Dura Quartz Sub-Zero

Dura Quartz Sub Zero is highly regarded for its effectiveness in sub-zero repairs, curing at temperatures as low as -40°C. It offers excellent chemical resistance and does not shrink, making it a reliable choice for extreme conditions. It features a very low odour, ensuring a more pleasant working environment even in challenging temperatures.

RX Quick-Screed

A semi-dry cementitious screed enhanced with proprietary additives to achieve early drying and high strength. It can be applied bonded, unbonded, or floating for weight saving and thermal or sound insulation, and is compatible with underfloor heating systems. It is ideal for high-traffic areas like airports, shopping centres, and hospitals, where a high-strength screed is needed, particularly for installations with thin finishes such as carpet, vinyl, wood, or resin.

RX Quick-Screed SL

RX Quick-Screed SL offers good resistance to impact, point loading, and abrasion, making it suitable as a temporary work surface for subsequent trades before vinyl installation.
